Woodlands, Singapore

Education

Singapore Polytechnic

Diploma in Computer Engineering
Smart City & IoT Applications

2023 - 2026

Certifications

- [Docker Fundamentals](#)
- [Kubernetes Fundamentals](#)

Skills

- Python, R, R Shiny
- C#, C / C++, PHP, JavaScript
- HTML / CSS, REST API
- MySQL / MariaDB / SQL
- Docker, Linux, CI/CD
- iFIX SCADA
- STM32, Arduino, ESP8266, Raspberry Pi, Bosch XDK
- Android Studio, R Studio, Power BI
- Cloud Computing (AWS Basic)
- IoT & Embedded Systems
- System Testing & Validation
- OOP, SDLC

Language

English (Fluent)

Myanmar (Native)

Korean (Elementary Proficiency)

About me

Computer Engineering graduate from Singapore Polytechnic (Smart City & IoT Applications), available immediately full-time. Hands-on experience building and deploying full-stack web applications using PHP, MySQL, JavaScript, and Docker during a semiconductor industry internship. Passionate about clean code, end-to-end development, and building practical software solutions.

Work Experience

Associate Software Engineer Intern Mar 2025 – Oct 2025
Applied Instruments Pte. Ltd.

- Designed, developed & deployed GatePass Tracking Web App (PHP, MySQL, JS, Docker) – tracking 286 service items with anytime, anywhere access.
- Supported equipment troubleshooting & validation during maintenance, contributing to system uptime.
- Represented company at SEMICON Southeast Asia 2025 (Marina Bay Sands) – manned booth and presented solutions to industry stakeholders.

Part-Time Technical Assistant Jun 2023 – Mar 2024
Applied Instruments Pte. Ltd.

- Developed C# and C++ UI components – real-time data visualisation panels and control animations for equipment monitoring desktop app.
- Designed PCB prototypes using Autodesk Inventor and CNC milling; implemented 3-axis CNC drilling simulation using G-code and Arduino.

Projects

- 5G AIoT Face Recognition – Python, OpenCV, Raspberry Pi; multi-threaded AI access control over 5G at 30+ FPS
- IoT School Locker – C++, ESP8266, RFID; PIN & RFID access, OTP reset, Telegram alerts, centralised activity logging
- Supermarket Self-Checkout System – Python, Raspberry Pi, MariaDB; barcode scanning, automated receipt printing, CI/CD
- Stock Market Web App – HTML, CSS, JavaScript, API integration; real-time price charts and interactive UI
- Red Wine Quality Prediction – R, R Shiny, decision tree, regression; EDA and classification modelling
